 We looked at the 12RK, then saw an SS and drove 300+ miles to purchase. The rugged build and versatility are great. No regrets.

WARRANTY INFORMATION

When you consider which RV you are going to purchase, there are a lot of different factors that come into play. One thing that varies greatly from manufacturer to manufacturer is the warranty. Not only how long the warranty lasts, but if it only covers the original owner or if it is transferrable to any subsequent owners.

At Encore RV, we are extremely confident in the products that we build, and wam with one of the best warranties in the industry!

Every Encore RV is covered by a transferrable 2-Year Bumper-to-Hitch Warranty plus a 5-Year Structural Warranty. We don't believe that our warranty is in place to cover the owner...it's there to cover the camper we built. That's why we offer one of the very few transferrable warranties in the industry. If you should ever sell your Encore RV, the next owner can take full advantage of any remaining warranty at no additional cost to them or you. All they have to do is register the camper in their name with Encore RV through our online registration and they're all set...it's that easy. See our website for full details: www.encore-rv.com

When you build a better product,
you can offer a better warranty!
